

# WBA for our Assignment FIT2099

Date created: 30/9/2021

**All the tasks are divided into three categories in nearly a fair amount of work. The requirements in each category are related which helped to facilitate coherent thinking, designing and completion.**

**An Khoa Nguyen is responsible for**

Requirement 1: New Map and Fog Door.

Requirement 2: Updated Bonfire

**Dongzheng Wu is responsible for**

Requirement 3: Enemy part

Requirement 4: mimic/Chest

**Ching Adrian Cheng is responsible for**

Requirement 3: Weapon part

Requirement 5: Trade CInder of Lord

## **Assignment Deadline 15th October**

1. Every requirements list above will be the ones that each of us will be responsible in designing and implementation
2. Every member must test their code themselves before pushing it to git
3. All implementations must be pushed to git before **11th October 23:55pm MELBOURNE TIME**
4. A progress check will be held every thursday **10PM MELBOURNE TIME**
5. If members have 3 requirements, they should **complete at least 1 per week**. If the member has 2 requirements only, he needs to **make progress on his code** each week so as to keep the implementation plan on time.
6. When coding a new method , a **Javadoc comment is required**. If member modifies any existing code, he must **put the changes in the group chat** so that everyone can be on the same page
